### Describe

My portfolio page is a brief introduction showcasing the skills I possess, accompanied by major projects undertaken during my academic journey and small, self-made applications developed through self-learning. Everything featured in the portfolio is designed and functionally implemented using ReactJS.

## PROFILE

I am a recent graduate in front-end development with proficiency in HTML, CSS, JavaScript, and React.js. I am enthusiastic about applying my creativity and commitment to learning in a professional setting. Although I have limited experience, I am excited to contribute my skills to a company, enhance my capabilities, and make a meaningful impact in a dynamic work environment. I am looking forward to the opportunity to apply my knowledge effectively
